

Careful what you flush!

Only flush the 3 P's - Pee, Poo & Loo Paper!

If you flush items such as baby wipes, nappies, tampons, sanitary pads and plastic cotton bud sticks, it can cause a blockage in the sewers (gross!). This can lead to pollution in our waterways and seas, can cause flooding into buildings and costs water companies millions of pounds to sort out every year.

Did you know that the items mentioned above all contain plastic? This means they may harm wildlife through entanglement or ingestion and will take hundreds of years to break down. Please always put these items in a bin.

PLEASE DON'T

BLOCK THE LOO!

ONLY FLUSH PEE,

LOO PAPER & POO!

Not these either

No thanks!
