

Reusable Coffee Cups

**Please accept reusable coffee cups
because disposable cups are rubbish!**

IT'S SAFE TO SERVE DRINKS IN A CUSTOMER'S REUSABLE CUP

YOU DON'T HAVE TO SAY NO BECAUSE OF COVID

YOU CAN DO THIS IN A WAY THAT AVOIDS CONTACT WITH THE CUSTOMER'S CUP

Here's how...

- Customer places their reusable cup (lid off) on your counter
- You pour coffee/hot water for tea into a normal crockery cup or espresso shot glass and steam the milk as required. Please don't use a disposable cup, the customer is trying to reduce single use waste.
- Without touching the customer's reusable cup, you pour the coffee/hot water and milk into the customer's cup
- Customer picks up their coffee cup and places the lid back on themselves

Over 115 health experts from around the world have said that reusables are perfectly safe to use providing basic health & hygiene guidance is followed.
